

Do you know the cost of caring for each one of your patients down to the last dollar?

Do you understand the variability in these costs?

Do you have the right tools to standardize procedures and lower costs per patient while still improving surgical outcomes?

Can you measure costs against patient outcomes, length of stay and patient satisfaction?

# SurgiPoint

Powered by ZH Solutions

## SURGIPOINT BRIDGES THE GAP BETWEEN COST DATA & ACTIONABLE INSIGHTS.

Surgipoint was created to empower institutions to reduce costs, avoid unneeded care, & deliver safer, better experiences to customers. We recognize some key challenges faced by healthcare providers:

- Delayed charting, and the resulting loss of accurate documentation of each procedure;
- Understanding your real costs of providing services to every patient;
- Analyzing patient flow for efficiencies.

### We address these challenges by:

- Providing electronic records of key delivery information and EMR integration (optional);
- Enabling a detailed overview of costs & outliers per procedure (in resources and supplies);
- Ensuring real-time understanding of patient flow.
- Tracking key metrics that create variability in cost, such as implants.

### Simple dashboards

SurgiPoint not only collects workflow data from across the organization — it makes it clear & actionable. With our real-time dashboards, you will be able to gauge your performance against key performance indicators.

### Supply and Equipment usage

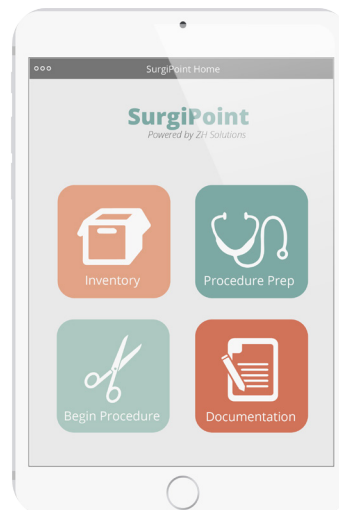

Delivered in real-time, this information empowers CFOs & facility managers to make immediate operational changes to improve workflow & reduce costs.

### Flexible and affordable

With SurgiPoint, there is no need for a capital investment or time-consuming equipment installation. Our platform complements your existing IT infrastructure & offers a convenient, affordable subscription model.

### ZH health platform

SurgiPoint is a key component of ZH Solutions for healthcare. This platform combines solutions for Wayfinding, Indoor Positioning of people & assets, Hand-hygiene Compliance along with advanced analytics & operational intelligence capabilities.

### Use it anywhere
